

GPS308 Technical Specification

GPS Tracker, which set multiple functions of accurately positioning, security, monitoring surveillance, emergency alarms and tracking in its entirety, special for vehicle. The product fully supports the functions of SMS / GPRS / Internet data transmission, to make it more widely used in large-scale monitoring, emergency scheduling, location-based services, traffic safety and many other areas of management.

Detailed Description:

It is based on GSM/GPRS (850/900/1800/1900MHZ) wireless telecommunication internet and GPS satellite global position system, track by several ways. Provide monitor software and global map. Real-time track through the monitor software in your pc; track through your PDA cell phone and Google earth.

Content	Specification
Dim	5.0×3.8×1.4cm
GSM Frequency	4 band 850/900/1800/1900Mhz
GPS Sensitivity	-165dBm
GPS accuracy	5m
GPS start time	Cold status 40s Warm status20s Hot status 1s
Multi-tracking ways	GPS+WIFI+LBS+ Three - axis sensor
Li-ion battery	3.7V 430mAh
Stand by	Standby 4 days

Function		
Basic function	Two way audio	Real time tracking
	Geo-fence	SOS alarm
	Alarm clock / clock	Route repeat
	pedometer	Forbidden to use in class
	Weather forecast	Fall alert
Special function	Tamper alert by light sensor	Voice dialing / voice reporting
	Language translation	Chat with this device
